Tested In Hill Crimbing.

During the last year the Great Westery has been tested out thoroughly on hill climbing, and the Munsey Historic Tour, acording to the entrants, will give the car just the opportunity they want to demonstrate its capacity for endur-

hold a record in California for the climb which the car made there on the road from San Diego to Lake Quiramaca. Fifteen miles of this trip was a steady climb, and the entire distance was traveled on the intermediate gear The engine never missed a shot, according to the reports to headquarters;

the carburetor was not touched, and the water in the jacket did not reach the

boiling point.

Clarence Lamar, the driver, has piloted the car through some of the worst roads in the South and West and brought it through the recent Glidden Tour among the leaders.

#### Tour Center of Interest.

The Munsey Historic Tour is regarded by the manufacturers and the technical men of the country as perhaps the most important automobile event of the year. The route to be traversed has not been gone over by a tour of national size for some years and certain parts of it have not been traveled by such a tour at all. Thousands of private owners and prospective owners are familiar with the course to be pursued. As a matter of fact, the course is one which has attracted great attention, and the behavior of the cars in the run will be a matter of the xreatest interest.

The course of the tour is thickly populated. The newspapers will give all the penalizations to the country at large as soon as they are announced by the technical committee.
